

Business Resilience and Adversity Management

At the Premier Resources Group (PRG), *We Build Relationships*. With our extensive experience in the areas of business resilience, crisis management, and recovery, we can be an excellent resource for your organization by accelerating your return to full operations after a business disruption and by offering insight into positioning your business for future success.

Site Closure and Securing

We'll help you elevate your site closure practices, which can help you reactivate your project safely and efficiently. With the right documentation and guidance, you will be able to plan your reactivation with confidence.

Navigating Through Extreme Adversity

Planning for success by successfully planning. By preparing for Crisis Management, your company's personnel will know what to do and how to do it. Thus, the impact of your interruption will be minimal and your bounce-back potential will be enhanced.

Business Continuity / Resilience Planning

Learn how continuity and resilience planning can help minimize first loss and downtime.

Business Strategy Refocus

Whether it's a pandemic or other significant event that impacts your organization, an important step when you are ready to reactivate your organization is to re-evaluate your business strategy.

Supply Chain

We can help your company define the changes required to improve your supply chain engineering, procurement, construction, and start-up cycle to optimize your risk while delivering improved project schedules and reduced capital and operating costs.
